

Kickstart Your Career in the Life Sciences with this GMP Basic Course!

GMP (Good Manufacturing Practice) are legally binding guidelines for quality assurance in the production, filling, packaging, storage and distribution of pharmaceuticals, cosmetics, food and feed. Knowledge of GMP is therefore an important core competence for a career start in the pharmaceutical, food or cosmetic industry.

Register for this course and learn the essentials of GMP, gain practical knowledge directly applicable to your future career and connect with potential employers!

Date: 3rd to 7th November 2025

Place: Online

The course is organised by the **Career Center** of Halle University and provided by the **GMP Academy**. After having successfully completed the course, participants receive a certificate of GMP Academy.

Due to external funding, for **international students** who are enrolled in a study/PhD programme at Halle University to receive a Bachelor, Master or PhD degree (degree-seeking students) the participation is free of charge. Please note that this does not apply to exchange or Erasmus students!

Please find all course details and the link for registration on [Jobteaser](#), our online platform for sharing our events. See the attachment for more information.

Best regards,

Hannah Brandt

Course leadership: Claudia Gärtner
(GMP Academy: Thomas Schmid & Tobias Halfpap GbR, Landsberg)

Program:

GMP (Good Manufacturing Practice) are legally binding guidelines for quality assurance in the production, filling, packaging, storage and distribution of pharmaceuticals, cosmetics, food and feed. Knowledge of GMP is therefore an important core competence for a career start in the pharmaceutical industry, food industry or cosmetics industry.

This GMP basic course focusses on topics that will be applicable to their industry position. The GMP Academy cooperates directly with well-known companies of the Life Science sector. In addition, the course participants get the opportunity to get in touch with potential employers.

After successfully passing the final exam, participants receive a GMP certificate, issued by the educational provider "Thomas Schmid & Tobias Halfpap GbR".
